Live Locally, Grow Globally

2020

When Osaka prefecture built a temporary hospital and medical school at Daifukuji temple in 1869 (Meiji 2), Koreyoshi Ogata, an heir of Koan, along with Ikuzo, his brother-in-law, and Sessai, his adopted son, were involved in its foundation.

This medical school went through many transitions over the years to become today's Osaka University Hospital.

The philosophies of Osaka University Hospital carry on the ideas of Koan Ogata.

* Osaka University was founded in 1931 as Japan's 6th Imperial University. However, the roots of Osaka University can be found in the Tekijuku school founded in 1838 by Koan Ogata. As the year 1868 saw the demise of the feudal era, the students and son of Koan Ogata played a central role in the founding of the temporary Osaka Hospital and the Osaka Medical School by the new Meiji government in 1869; over the years they went through many transitions until the two faculties of medicine and science were put together to found the Osaka Imperial University in 1931.

Certificate of Hospital Accreditation

In January 2016 it was recognized as meeting the latest standards (3rdG:Ver. 1.1) by the Japan Council for Quality Health Care.

Accreditation for clinical research core hospital

Received approval from the Ministry of Health, Labour and Welfare in August 2015.

ISO15189 certification Certified by the Japan Accreditation Board in

September 2015.

Designated a Cancer Genome Core Hospital Designated by the Ministry of Health, Labour and Welfare in

March 2020.

Designated as an Osaka Prefecture Intractable **Diseases Collaborative Core Hospital**

Designated by Osaka Prefecture in November 2018.

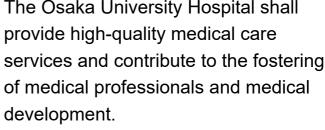

Medical Service Accreditation for International Patients (JMIP) Reconfirmed by the Japan Medical Education

Foundation in March 2019.

Principles

The Osaka University Hospital shall provide high-quality medical care of medical professionals and medical development.

Fundamental Policies

- To provide patient-centered, safe and reliable holistic medical care services
- To develop and implement advanced medical care and future medical technology
- To contribute to social and community medical
- To foster excellent medical professionals rich in

Protection of Patients' Rights

- Patients have the right to receive medical treatment that respects them as people.
- Patients have the right to receive safe, high-quality medical care services.
- Patients have the right to receive satisfactory explanations and information.
- Patients have the right to receive a second opinion from other medical institutions.
- Patients have the right to select their preferred treatment at their discretion.
- Patients' privacy (personal information) shall be protected.

Obligations of Patients

- Patients shall adhere to the rules defined by the Osaka University Hospital and refrain from creating any nuisance.
- To describe one's medical condition as accurately as possible.
- To communicate one's intentions and opinions in order to receive the most appropriate course of treatment.
- To understand the course of treatment and provide cooperation.
- To accurately report one's healthcare insurance, and pay the medical fee incurred.

Research and Development in Advanced Medical and Surgical Treatment with Comprehensive Competence and Excellent Safety Standards

[Education] Training of excellent and humane care givers

- We train doctors who combine clinical and research abilities.
- We promote training for specific actions.
- We promote the development of medical professionals in the fields of nursing and medical technology while continuously developing a
 practical training package that contributes to improving the ability of staff to provide treatment safely.

[Research] Development and practice of future medical care

- Focusing on the Department of Medical Innovation, we will enhance our clinical research support system as a base for clinical research.
- We meet the requirements of the regulations of clinical researches such as the Clinical Trials Act.
- Promotion of Al Hospital Project.
- Promotion of medical data utilization demonstration projects using the information trust function.

[Medical treatment] Offering advanced medical care

- Under the leadership of the Hospital Director, we plan to re-examine the consultation system and raising the efficiency of work operation.
- We will strengthen cooperation with national and local governments.
- To ensure the medical care environment required as an advanced functions hospital, we work to enhance and improve our facilities, while also updating and maintain our line of medical equipment.
- We will work to further improve our patient care system and promote the provision of safe and secure medical care from the patients' perspective.
- One of only two facilities in Japan that can perform transplants for all organs. We will continue to actively develop advanced, cutting-edge organ
 transplant medicine and act as a model for transplant medical care in Japan as a responsible organ transplant and donation hospital with a fullydeveloped organ donation system including children.
- We will promote advanced medical treatment and improve medical standards through advanced medical development.
- We work to advance cancer genomics.
- We study hospital information systems.

[Contribution to regional medical services] Network with regional medical service institutions

• In cooperation with each center, we plan to contribute to regional medical care.

[Internationalization] Globalization of medical care and education

We will actively promote and develop medical care systems for overseas patients and in-hospital training systems (inbound) for foreign health
care workers at the Center for Global Health, as well as the global expansion system (outbound) of products and medical technologies such as
pharmaceutical products, medical equipment, and regenerative medical products developed domestically centering on our hospital, and issues
related to international medical care and in-house hospital staff education (international medical studies and education).

[Management] Strengthening the foundation for hospital management

- Under the leadership of the Hospital Director, we plan to re-evaluate the administration systems and promote improvement in management efficiency.
- We are conducting studies on disaster prevention measures and disaster medical treatment with the aim of fortifying our system of cooperation both inside and outside the hospital.

03 Osaka University Hospital Osaka University Hospital

History

1870

1879

1838 The scholar of Dutch learning Koan Ogata opened the school Tekijuku.

1869 The new government set up Osaka Hospital (Headed by Ogata family) which was under the direct control of Ministry of Education in the Okumi Uchikyuhoujimachi in Osaka prefecture (current Tennojiku, Uehonmachi in Osaka city), taking up the proposal by Tatewaki Komatsu, Shojiro Goto.

The Ministry of Education transferred the hospital to Osaka prefecture, and Osaka prefecture established a prefectural hospital and medical center.

1871 It was put under direct control of the Ministry of Education

1872 Accompanying the school system reform led by Ministry of Education, the medical center and hospital were abolished.

1873 Feb. Osaka prefecture opened the Osaka Prefectural Hospital in Nishihonganji Kakesho and created a teaching faculty office.

Mar. The new hospital was built in Kita-ku Joancho, and the name was changed to Osaka Public Hospital at the same time it was transferred. In addition, it created a teaching faculty office.

1880 Mar. Renamed Osaka Prefectural Hospital, splitting off the teaching faculty and Osaka Prefectural Medical School was established.

1888 Jan. Osaka Prefectural Hospital was included in the Osaka Prefectural Medical School, and the school name was changed to Osaka Medical School.

1893 Mar. Opened Osaka Medical School Midwife Training Center.

1898 Apr. Osaka Medical School Nursing Center was established.

1903	Oct.	The name was changed to Osaka Prefectural Advanced
		Medical School in line with the Professional School Act.

1915 Oct. Renamed Osaka Prefectural Medical College.

1919 Nov. Osaka Prefectural Medical College was abolished and the hospital and Osaka Medical College were reestablished by the University Ordinance.

1924 Oct. Renamed to Osaka Medical College Hospital. (Dojima Hamadori, Kita-ku, Osaka City)

1931 May Osaka Imperial University was founded. Osaka Medical College was transferred to Osaka Imperial University and renamed Osaka Imperial University Medical School.

1939	Jan.	The East building was added.
1943	Apr.	The name of the area changed from Dojima Hamadori, Kita-ku to Dojima Hamadori, Fukushima-ku.

1945 Jun. The nursing training center was renamed as Women's Welfare Department.

1947 Oct. Osaka Imperial University was renamed Osaka University.

1949

May Incorporated as a new university according to the proclamation of the National School Establishment Law and Osaka University Clinic was renamed Osaka University Hospital.

1951 Apr. Renamed Osaka University Hospital Women's Welfare Department as Osaka Nursing School.

1952 Apr. Osaka University Medical X-ray Technician School and Osaka University Midwife School established.

1953 Aug. Consequent to the founding of Osaka University Dental Hospital (March 1951), dentistry was separated from the clinical department of Osaka University Hospital.

1963 Apr. Changed the name Osaka University Nursing School to Osaka University Medical School of Nursing.

1964 Mar. The first stage of hospital reconstruction is completed.

1965 Apr. Osaka University School of Medical Technologists is established.

1966 Apr. A specialty course is established in the Osaka University Medical X-ray Technician School.

Dec. The second stage of hospital reconstruction is completed.

1968 Mar. The School of Medical Technologists is abolished in the school year following the establishment of the Osaka University Junior College of Medical Technology (June 1967).

Apr. The branch of Osaka University Hospital is integrated into the main institution.

1969 Apr. The School of Nursing and the School of X-ray Technologists are abolished in the school year following the establishment of the Osaka University Junior College of Medical Technology.

1970 Oct. The third stage of hospital reconstruction is completed.

1971 Mar. The school lunch building is completed.

1973 Aug. The fourth stage of hospital reconstruction is completed

1989 Mar. Started new construction of wards in Suita city, Yamadaoka.

1993 Sep. Simultaneously transferred from the Nakanoshima campus (Osaka, Fukushima-ku) to the Suita campus and integrated the Research Institute for Microbial Diseases University Hospital.

1993 Oct. Canceled development of Osaka University Junior College of Medical Technology and established the School of Medicine, Division of Health Sciences.

1994 Nov. Recognized as an advanced treatment hospital.

1995 Jan. The hospital was greatly damaged in the Great Kobe Earthquake, which occurred January 17th at 5:46 am.
 Mar. Completed a ward with a positron nuclear medicine diagnostic system.

1996 Mar. Closed the Osaka University Junior College of Medical Technology.

1997 Mar. Closed the Osaka University Midwife School.Jul. Recognized as a heart transplant hospital.

1998 Apr. Recognized as a lung transplant hospital.

Conducted the first heart transplant from a brain-dead donor after the enactment of the transplant law. Recognized as a small intestine transplant hospital. Completed the heliport on the roof of the hospital. 2000 Apr. Reorganized the care wards from 22 departments to 6 major care centers. Recognized as a liver transplant hospital. 2001 Certified by the Japan Council for Quality Health Care. 2004 Apr. In line with the promulgation of the National University Juridical Entity Act, renamed Osaka University as National University Corporation. 2006 Jan. Certified as Ver. 5.0 by the Japan Council for Quality Started operating an air ambulance service under 2008 Jan.

Recognized as a pancreas transplant hospital.

1999 Feb.

2009	Apr.	Designated as an Osaka Cancer Care District Liaisor Hospital.
2011	Jan.	Certified as Ver. 6.0 by the Japan Council for Quality Health Care.
2012	Jun.	Performed heart transplant from the first brain-dead child donor (under age 10) after the revision of the Transplant Act
2015	Mar.	Certified as a hospital with a high quality ethics committee
	Aug.	Certified as clinical research core hospital.
	Sep.	Completion of oncology center. Received ISO certification for clinical examination.
2016	Jan.	Received 3rdG:Ver.1.1 certification from the Japan Council for Quality Health Care.
	Mar.	Certified for Japan Medical Service Accreditation for International Patients (JMIP).
	Sep.	Recommended by Japan International Hospitals (JIH).
2018	Feb.	Designated a Cancer Genome Core Hospital.
	Nov.	Designated as an Osaka Prefecture Intractable Diseases Collaborative Core Hospital.
2019	Mar.	Re-certified for Japan Medical Service Accreditation for International Patients (JMIP).

Introduction of Doctor Car and DMAT Car.

Hospital (Advanced Type).

Designated as an Osaka Cancer Care District Liaison

Legal Authorization of Medical Services (As of May 1, 2020)

Approval of medical institutions

- Clinical training designated hospital
- Establishment permit based on paragraph 1, Article 7 of the Medical Act (Approval)
- Medical institutions with insurance based on the Health Insurance Act (Specific approval)
- Medical institutions based on the Livelihood Protection Act
- Medical institutions based on the Workers' Accident Compensation Insurance Act
- General medical treatment based on the Medical Treatment for Atomic Bomb Victims Act
- Certified medical treatment based on the Medical Treatment for Atomic Bomb Victims Act
- Pregnant woman and infant health examination based on the Maternal and Child Health Act
- Nurturing medical care based on the Maternal and Child Health Act Welfare medical care based on The Special Aid to the Wounded and Sick Retired Soldiers Act
- Usage approval of the special-function hospital name
- AIDS treatment core hospital
- Osaka disaster base hospital
- Designated notification agency (Core agency) based on The Prevention of Infectious Diseases Act
- Osaka tertiary emergency medical institution
- Osaka hepatitis special medical institution
- Stimulants administering institution established in the country based on The Stimulants Control Act
- Rehabilitation medical care based on The Services and Support for Persons with Disabilities Act

- Training medical care based on The Services and Support for Persons with Disabilities Act
- Mental hospital visitation based on The Services and Support for Persons with Disabilities Act
- Immigration management based on the Immigration Act and doctor specified based on The Refugee Recognition Act
- Osaka designated Center for Maternal, Fetal and Neonatal Medicine
- Designated hospital based on the Medical Care and Supervision Act
- Osaka Liver Disease Care Liaison Core Hospital
- Osaka Cancer Care District Liaison Hospital
- Designated Medical institutions for Specific Chronic Diseases in Children based on paragraph 9(1), Article 19 of the Child Welfare Act
- Designated medical institutions based on the provisions of paragraph 1, Article 14 with respect to medical care for patients with incurable diseases
- Clinical professor designated hospitals
- Clinical Research Core Hospital under medical law
- Cancer Genome Core Hospital
- Osaka Prefecture Intractable Diseases Collaborative Core
- Accredited Medical Institution for International Patients
- Osaka Prefecture Children's Cancer Base Hospital
- Osaka Cancer Care District Liaison Hospital (Advanced Type)
- Osaka Prefecture Epilepsy Treatment Base Institution
- Osaka Prefecture Base Accredited Medical Institution for **International Patients**

*Bold indicates approval specified by Osaka Prefecture

Advanced medical treatment

- Islet transplantation using brain-dead donors and donors after cardiac death for patients with insulin-dependent diabetes mellitus suffering from complicating hypoglycemia unawareness Insulin-dependent diabetes mellitus suffering from complicating hypoglycemia unawareness
- Combined therapy of paclitaxel intravenous administration (administration is limited to once a week.) and carboplatin intraperitoneal administration (administration is limited to once in three weeks.)
- Epithelial ovarian cancer, carcinoma of fallopian tube or primary peritoneal cancer Restoration therapy of meniscus using collagen meniscus supplemental material
- Meniscus damage (limited to patients diagnosed with meniscal loss by arthroscopy.)
- Recurrence control treatment using perioperative carperitide intravenous administration
- Non-small cell lung cancer (excluding those diagnosed with non-invasive cancer by CT imaging.)
- Spinal cord regeneration therapy through olfactory mucosa autograft
- Thoracic spinal cord damage (limited to patients whose lower limbs are fully paralyzed even after 12 months following damage (AIS is deemed to be A by the American Spinal Injury Association.))
- Remission maintenance therapy by oral administration of mycophenolate mofetil after drip infusion of rituximab Idiopathic nephrotic syndrome (relating to patients whose age at the time of onset of symptoms of the disease is under 18 years of age, limited to frequent withdrawal relapsing or steroid dependence.)
- Combination therapy of temozolomide and radiation therapy after massive methotrexate therapy before irradiation and maintenance therapy for internal administration of temozolomide
- Central nervous system primary malignant lymphoma at the initial stage (confirmed to be a diffuse large B-cell lymphoma from a pathological standpoint and limited to those whose primary site is the cerebrum, cerebellum, or brain stem.)
- S-1 oral administration before surgery, intravenous administration of cisplatin and intravenous administration of trastuzumab in combination therapy Gastric cancer with advanced lymph node metastasis that can be resected (limited to those positive for HER2.)
- Temozolomide dose intensification therapy
- Glioblastoma (limited to those who had relapsed or exacerbated after the initial treatment at the initial stage.)
- Multiplex genome panel testing Refractory solid-tumor cancers (Limited to stage III or IV and inoperable or relapse after treatment, for which there is no treatment or for which conventional treatment has ended or conventional treatment is scheduled to be ended, excluding sarcoma.)
- Postoperative oral administration of aspirin as therapy

Finance/Translational Research

Income and Expenditure (FY 2019) * Excluding facilities expenses and external funds, such as from contract research

Income (Unit: 1000 yen)

Description			Amount
Equipment Maintenance	PET-CT devic	е	432,000
Total			432 000

[Promotion of Translational Research]

We implement and promote translational research (TR), through which we develop new medical care, use it on a trial basis to confirm its effectiveness and safety and eventually apply it to medical care on a daily basis.

■ Number of TR implementations (FY 2019)

- New TR ideas support projects: 20
- Number of newly permitted clinical research projects: 3 (Investigator-initiated clinical trial)

Globalization of medical care, education and research

In April 2013, the Center for Global Health was set up as a department at our hospital to consistently perform various tasks and coordination related to foreign medical care and treatment as well as training for medical treatment of foreigners. The department aims for the globalization of medical care, education, and research in cooperation with each department and is engaged in the following projects.

Inbound infrastructure development

- Development of overseas patient acceptance system
- Promotion of acceptance of medical training from overseas
- Formation of international medical network in Kansai

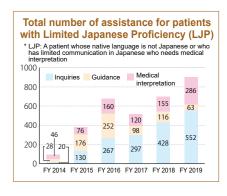

- Deployment of Japanese pharmaceutical products and medical equipment to the world market
- Promotion of international joint clinical trials and research
- Overseas expansion of Japanese medical systems

International medical education and research

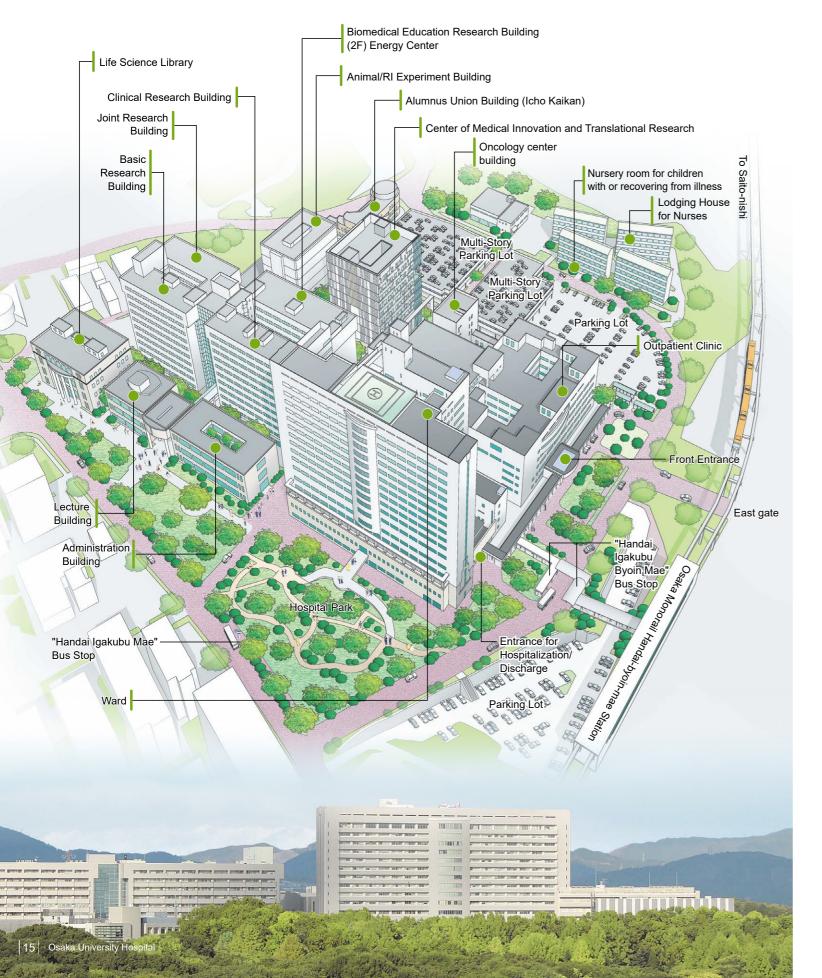

• Promotion of International Medical Education and Research in cooperation with the internal and external research and education facilities of Osaka University

International functional evaluation

- Preparation for Joint Commission International (JCI) examination.
- Inspected and re-certified for Japan Medical Service Accreditation for International Patients (JMIP). (Updated March 2019)
- Recommended by Japan International Hospitals (JIH). (Updated September 2019)
- Selected as an Osaka Prefecture Base Accredited Medical Institution for International Patients. (October 2019)

Opening of Palliative and Supportive Care Center

The Palliative and Supportive Care Center was established on April 1, 2019 as a department to support the various types of suffering of patients being treated for diseases such as cancer and severe heart failure. A range of professionals work together from the perspective of palliative care to provide this support.

In the past, palliative care was considered to be end-of-life care for patients for whom there was no cure for their disease. But nowadays, it is provided at the same time as the treatment of the disease from the time the disease is diagnosed. Medical treatment is provided while the suffering of the patient and their family is alleviated. We set up a palliative care team at our hospital in 2004, and we have been working on the relief of symptoms such as pain and emotional hardship mainly for cancer patients. Our goal for the Palliative and Supportive Care Center is to respond to the needs of a great number of patients and their families, and to actively engage in palliative care for people with diseases other than cancer as well, such as severe heart failure. Palliative care is becoming more and more important with the increased sophistication of medical care, and in fiscal 2019, we provided palliative care to a large number of patients. Going forward, we plan to further enhance palliative care at our hospital.

• The three teams that make up the center. From top: the Cancer Palliative Care Team, the Heart Failure Palliative Care Team (Shinwa Team), and the Children's Cancer Palliative Care Team

Introduction of Doctor Car and DMAT Car

The long-awaited Doctor Car and DMAT Car were introduced to our hospital in April 2020. This is a result of Osaka Prefecture's FY2019 emergency patient transport system development project, and together with the Doctor Helicopter already in operation, it is expected that the Doctor Car and DMAT Car will greatly contribute to future emergency medical care and disaster response

A Doctor Car is an emergency vehicle owned by a medical institution that is dispatched by a doctor to an emergency site. Generally, a Doctor Car is dispatched at the request of a fire crew after receiving a 119 call. The advantage is that the doctor can see patients more quickly and start treatment at the emergency site at an early stage. It is also very useful for transporting critically ill patients between other medical institutions and our hospital.

The DMAT Car is an emergency vehicle used by DMAT (Disaster Medical Assistance Team) at the time of a disaster. Osaka DMAT has been dispatched to many disaster sites in the past, but it has been difficult to dispatch team members because there was no dedicated vehicle. The new DMAT Car is a "one-box" type van, which will be able to support a variety of activities in the event of a disaster in collaboration with the Doctor Car.

Three qualified paramedics were hired in April to drive the Doctor Car and DMAT Car. In addition to driving the emergency cars, they will be involved in first-aid treatment at the Advanced Emergency Lifesaving Center.
